

Two ways a positive answer fails its evidence

Off-target

the passage answers a
neighbouring question

The flaw sits in the gap
between what the passage
discusses and what is asked

Verifier
rejects

Disagreement reaches
the Adjudicator

On-target but insufficient

a draft strategy read as
a finished practice

No discrete flaw to name,
only a judgement that the
evidence is too weak

Verifier
passes

No disagreement is drawn.
The answer commits

Only the upper failure is locatable, so only it becomes a disagreement. The lower row is where the committed false positives sit.
